VP-2009 represents the next generation in personal IP multimedia communication. It is equipped with TI DaVinci chipset, a 7" LCD touch screen with 800x480 pixels and a 300K adjustable CMOS sensor camera, adopts the most advanced H.264 codec and supports adaptive bandwidth adjustment technology. All of those guarantee an excellent face-to-face user-experience even at low bandwidth. Besides, it provides the rich external interfaces including 2xRJ45, 1xUSB, 1xSD, 2.5mm headset, A/V out for function extension like browser, media player, and online/offline advertisement etc. which can improve the ARPU of ISP. The extraordinary video quality, advanced telephony features, rich applications, fashionable outlook, sturdy and durable structure, ensure VP-2009 as an ideal communication device for corporate office and residential users.
